

21.8.24

Subject 6 → Hair falling into face a bit

- re-calibration after ~~re-cal~~ Job description
- After 3rd resume → looked at Job descr. again
- Maria Rossi - really fast decision
- Kare - also quite fast (not as fast as Maria)
- Tian also quite fast
- Leyla really fast again

Subject 7 → with glasses

- Eye calibration not the best
- I think he looked at the keyboard when pressing for Viktor (first)
- Looked at Job description after 3rd resume? (Emilia)
- ↳ Restart with Subject 7b (→ Skipped the first 3 resumes here) because Eye Tracker stopped working correctly
- The one before Lea was relatively fast (not too fast), also Kare quite fast as well as the one after Kare

15.8.15

Subject 8 → without glasses

→ At the start it was lagging a bit

↳ Fixation might be off

→ For 1. resume looked at key board once

→ Looked at job description again & wanted to keep looking at it so he may have trouble remembering correctly

→ Restart after 2 CVs → subject 8b:

→ Fixation Cross before Emilia: I was talking here so there might be off-fixation

→ During Hans: asked about German Language Level (→ watch out for Head moving)

Subject 9 → with glasses

→ wanted to know how many participants
↳ told him ~ so he is already anticipating 12

→ started talking during Viktor:
his question was: do I need to read
everything on the resume or just the parts
that are relevant (~ so after this resume
his fixations may lessen to only the
important areas)

Subject 10

→ also wanted to know how many resumes

→ pretty fast overall

Calibration with Zubair:

Rahul, Picture

1. Name, Pic, Hobbies, Experience,

2. Viktor Pic: Skills, Languages, Pic,

3. Hannah Pic: Name, Experience, Skills,
Soft Skills

22.8.24

Subject 11 → Eye Tracker didn't work
(female, Asian) → test dummy version
→ didn't fully remember job requirements
for first CV
↳ Looked at it afterwards
↳ Leyla really quick

Subject 12 → knew how many CVs prior

1. CV calibration / fixation cross appeared
too fast → gaze might be off here a little
- 1. CV really fast (even though qualified)
- Tian CV also really fast ↳ I think
- did not have to look at job description
again at all.

22. & 24

Subject 11 → Eye Tracker didn't work
(female, Asian) ~ test dummy version

→ didn't fully remember job requirements
for first CV

↳ Looked at it afterwards

↳ Legla really quick

Subject 12 → knew how many CVs prior

1 CV calibration/fixation cross appeared

too fast → gaze might be off here a little

→ 1. CV really fast (even though qualified)

→ Tian CV also really fast ^{↳ I think}

→ did not have to look at job description
again at all

→ Looked at nationalities

→ At first more lenient, later after 5-6

CVs became tougher with the decisions,
tried to follow the requirements more
strictly

→ mentioned that he followed measurable

qualification criteria → so e.g. did not
look or consider soft skills as much
because they don't provide a definite
decision criteria
